

MISSION STATEMENT

“Our mission is to be the leading “one source” global provider of technology-enabled asset protection solutions used to evaluate the structural integrity of critical energy, industrial and public infrastructure.”

We will combine our industry-leading and innovative products, systems and software technologies, expertise in mechanical integrity (MI) and nondestructive testing (NDT) services and proprietary data warehousing and expert analysis software to deliver a comprehensive portfolio of customized solutions, ranging from routine inspections to complex, plant-wide asset integrity assessments and management. These mission critical solutions enhance our customers’ ability to extend the useful life of their assets, improve availability and productivity, minimize repair costs, comply with governmental safety and environmental regulations, manage risk and avoid catastrophic incidents.

We will accomplish this through the effective use of Ultrasonic, Acoustic Emission, Eddy Current, Thermography, Radiography, Vibration and other advanced proprietary products and systems, technology-enabled inspection and wireless and online monitoring services, and the collective efforts and talents of our scientists, PhD’s, other degreed engineers, highly skilled certified technicians and team members in all of our locations throughout the world focusing on safety, customer satisfaction, innovation and productivity.
