### **MISTRAS Receives Safety Award from Sunoco Marcus Hook Refinery**

**Princeton Junction, NJ – May, 2011** – MISTRAS Group, Inc. is proud to announce the receipt of the Sunoco Safety Award for their exceptional safety performance at the Sunoco Marcus Hook refinery.

The award was presented based on work performed in 2010 by NDT inspectors from MISTRAS' Northeast Regional office in Trainer, Pa. The MISTRAS team obtained an Occupational Safety and Health Administration (OSHA) recordable rating of less than 0.37 while doing contracted work within Sunoco Marcus Hook. Weekly safety audits and quarterly safety meetings are used to evaluate employees throughout the year to determine if the company qualifies for the award.

“We are extremely pleased to have received this award. All of us here at the MISTRAS Services Philadelphia lab have put a lot of emphasis on workplace safety and through the focus and dedication of our field services and management group; we have been able to achieve the goal of zero OSHA recordable injuries,” said Collin Eckerd, General Manager for the Trainer Lab of MISTRAS Services. “Safety is the job of all of our employees, and through raised awareness and good communication, we can better ensure an injury free workplace. Congratulations for a job well done!”

*About MISTRAS Group:*

MISTRAS is a leading “one source” global provider of technology-enabled asset protection solutions used to evaluate the structural integrity of critical energy, industrial and public infrastructure. Mission critical services and solutions are delivered globally and provide customers the ability to extend the useful life of their assets, improve productivity & profitability, comply with government safety and environmental regulations and enhance risk management operational decisions.

MISTRAS uniquely combines its industry-leading products and technologies - 24/7 on-line monitoring of critical assets; mechanical integrity (MI) and non-destructive testing (NDT) services; and its proprietary world class data warehousing & analysis software- to provide comprehensive and competitive products, systems and services solutions from a single source provider.
