

Mini B-Scan Single Axis B-Scan

Introduction

MISTRAS Products & Systems, a member of MISTRAS Group Inc., has expanded their family of scanners which can be used with their Pocket UT™ battery-operated, hand-held, stand-alone, full C-Scan data acquisition system.

The Mini B-Scan, a compact, durable single axis B-scan, can scan circumferentially on pipe diameters of 3" and greater and up to temperatures of 500°F. The scanner comes standard with a spring loaded .375" diameter dual element 5 MHz dual transducer capable of high temperature applications and a 10' transducer cable.

This portable scanner fits in the palm of your hand and weighs only 10 ounces. Equipped with magnetic wheels, it has an irrigation port for water or oil for use during ultrasonic testing.

The encoder is sealed and water tight to protect against moisture ingress and gear driven to prevent slippage.

Mini B-Scan is designed for use with our Pocket UT™

Mini B-Scan Magnetic Wheel Encoder

MISTRAS Products & Systems division, is a team of skilled researchers, engineers, technicians and manufacturing personnel dedicated to the development of practical and cost saving solutions to your challenging inspection needs.
