

## Pocket Corrosion Inspection Package

### ***A Complete Corrosion Inspection System***

### ***For various Industries and Applications***

The Pocket Corrosion Inspection Package consists of our Pocket UT Hand-held C-Scan System and our new Pocket U2 Ultrasonic Thickness Gage. This package is used for non-destructive inspection, helping prioritize which equipment inspection is most critical.

The Pocket Corrosion Package gives an operator the tools necessary to do a complete corrosion inspection and quickly collect data. From thickness readings to full C-scan mapping, the Pocket Corrosion Inspection Package is the ultrasonic system of the future.

With the addition of the Pocket U2 Ultrasonic Thickness Gage to our innovative Pocket UT product line, this is the most complete ultrasonic corrosion system.

The features and benefits with the Pocket U2 included in this package are:

- Color A-scan TFT Screen
- Fast min-max Capture Mode
- B-scan
- Echo to Echo Mode
- Visual and Vibration Alarms
- Large memory for storing up to 100,000 thickness readings

### **Pocket Corrosion Inspection Package Includes:**

- Pocket UT™ Hand-held C-scan System
- Pocket U2 Gage with 5MHz dual transducer
- M-scan, Single Axis Encoded Scanner
- Protective Pouch and Stylus
- UT Win Replay and UT Win XL
