

## Your Midstream Non-Destructive Testing Solutions Provider

### LOCAL PRESENCE, GLOBAL REACH!

At MISTRAS Group, we are committed to the Marcellus region and the Midstream Oil & Gas industry with 9 strategic regional locations and over 68 offices worldwide.

Our dedicated operations, with a full line of advanced and traditional Non Destructive Testing (NDT) capabilities are supported by highly trained, experienced and certified pipeline crews to support your drilling and pipeline operations.

Our experience and reputation as a single-source Non-Destructive Testing (NDT) solutions provider for the midstream market is based on our vast array of services, products and software.

With our turnkey solutions, global reach and financial stability, you can rest assured that you have a major partner on your side to meet your critical midstream project requirements.

### VALUE CHAIN NDT SOLUTIONS

*Wellhead, Gas Gathering, Transmission Lines, Compressor Stations, Storage Tanks...*

### PIPELINES

Whether you require Traditional Radiographic Testing (RT), Internal Crawlers -from 6" to 60" pipe diameters- or fully Automated Ultrasonic Systems, we have all the equipment, experience and capabilities that is required.

### PIPELINE FACILITIES

Our vast experience with Traditional NDT (Non-Destructive Testing) Services such as Radiographic Testing (RT), Magnetic Particle Testing (MT), Ultrasonics Testing (UT) and Penetrant Testing (PT) can assist with all your inspection requirements.

### STORAGE FACILITIES

*API 653, Automated Ultrasonics...* Large Structure Inspection (LSI), is a fully automated turnkey Ultrasonic Inspection System performing high-speed UT imaging. This in-service system saves the owner downtime and tank assessment data critical to the safe storage of materials. We also provide full time API inspectors.

### ADVANCED NDT SOLUTIONS PRODUCTS, SERVICES & SOFTWARE

#### Automated Ultrasonics

- TOFD - Time of Flight Diffraction
- LSI - Large Structure Inspection
- GUL - Guided Wave Ultrasonics
- Pocket UT -Portable C-Scan Imaging System

#### PdM - Predictive Maintenance

- Vibration & Lube Oil Analysis
- Thermography
- Asset Condition Monitoring
- Visual Inspection/CWI

#### Remote Online Monitoring

- PIM (Permanently Installed GUL Monitor)
- Acoustic Emission (AE)

#### Mechanical Integrity Services

#### Risk-Based Inspection & Assessment

#### Asset Integrity Management Software
