

# Diving and Subsea Solutions by MISTRAS

MISTRAS is your one-stop destination for turnkey underwater solutions, from inspection and feasibility consulting to construction, welding, and maintenance. Our expert integrated approach streamlines project management, reduces downtime, and ensures safety and quality at every stage.

## Construction

- Core Drilling
- Welding (AWS and CWB-certified for both topside and underwater welding)
- Oxygen-arc Cutting
- Formwork Installation
- Concrete Pouring
- Injection
- Demolition
- Excavation
- Mechanical Structure Assembling
- Cofferdam Assistance
- Scour & Erosion Repairs
- Surface Preparation
- High-Pressure Cleaning & Chipping
- Cathodic Protection System Installation

## Inspection

- Hand-On Inspection
- ROV Inspections
- Technical & Dimensional Surveying
- Non-Destructive Testing
- Structural Verticalities & Horizontalities
- Sampling
- Video & Photo Surveys
- Marine Salvage
- Search & Rescue
- Impact Study
- Species & Marine Surveys
- Flood Monitoring & Assistance
- Bathymetry Measures

## Consulting

- Diving Project Feasibility Studies
- Surveillance & Assistance
- Project Management

## Working Environments

- Wharfs
- Dams
- Hydraulic Works
- Bridges & Culverts
- Ports & Harbors
- Locks
- Nuclear Power Plants
- Mines
- Marinas & Vessels
- Contaminated Sites
- Water Process & Treatment Plants
- Pipelines

## The MISTRAS Advantage

- Highest Level of Certification (diving, welding — topside and underwater)
- The only CWB-approved underwater welding procedure in Canada
- Over 100 years of collective experience
- A large, highly-trained team equipped to handle large and complex projects

*Expert support for underwater and topside construction, maintenance, and inspection*

*Highly-certified programs and divers ensure safe access to subsea assets*
