

HIGH-SPEED, HIGH-QUALITY: METALS TESTING AND CONSULTING

- Competitive turnaround time
- On-site metallurgical engineers and certified weld inspectors
- Expertise in codes, metallurgy, and welding
- Welding program development and expansion
- In-house weld procedure and welder qualification testing

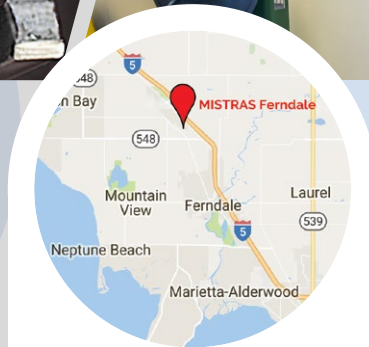

MISTRAS' WASHINGTON METALS LABORATORY

MISTRAS Group's Ferndale, WA-USA metals lab is your OneSource for your weld and material testing and program development needs.

We work quickly (with flexible schedules and swift turnaround times), and expertly, with on-site CWIs/CWB inspectors and metallurgical engineers. We offer a wide range of consulting services, including advice on codes and beginning, expanding, or upgrading your welding program and procedures. We'll walk you through the tests your assets need, perform them, and help you design your qualification tests to best match your current and future needs.

We're also equipped for field services, in combination with MISTRAS' Bellingham, WA office. Our teams offer a wide range of non-destructive examination (NDE) inspections, rope access services, in-situ metallography, and more.

Other Qualifications

- WABO Registered Welder Testing Facility
- ASNT SNT-TC-1A Qualified Visual/NDE Inspectors

Welding Program, Qualification, And Code Consultation Services

- Establish/Update/Expand Certified Welding Programs
- Procedure Qualification and Development for Welder, Operator, Welds
- Prototype Testing

Weld Procedures/ Welder Qualifications:

- ASME B31.1, B31.3, ASME Section IX, etc.
- AWS D1.1-6, D1.8, B2.1
- WABO, API, USCG, ABS, DNV, etc.
- NavSea and Military Specs

Mechanical/Weld Testing

- Tensile • Charpy Impact
- Bends • Hardness

Visual and Microscopic/ Metallurgical Testing

- Visual Inspection
- Macro/Micro Etch
- Microstructure and Grain Structure Analysis
- Failure Analysis
- Carbon Fiber Porosity
- Weld Evaluation
- Corrosion/Ferrite Testing

Field Inspection Services

- RT, MT, PT, UT
- Visual Weld/Part Inspection
- Vendor Surveil./Auditing
- In-Situ Metallography
- Optical Emission Spectroscopy (OES)
- Rope Access

Material Identification and Chemical Analysis

- PMI
- Chemical Composition
- Metal Alloy Identification
