

At-Height Services for Amusement Park Rides and Facilities

MISTRAS delivers expert rope access services to help amusement parks stay safe, compliant, and operational—without disrupting the guest experience. Our certified, multi-disciplined technicians reach elevated, confined, and complex areas that traditional methods can't access safely or cost-effectively.

From ride structures to resort facilities, MISTRAS enables safer, faster, and more aesthetically-discreet inspection and maintenance.

Why MISTRAS for Amusement Parks?

- ▶ **Certified, multi-disciplined technicians** trained in confined and elevated access
- ▶ **Rapid deployment & minimal guest impact** with nighttime or non-invasive service options
- ▶ **Operational continuity**—no need for bulky scaffolding or long ride shutdowns
- ▶ **Rigorous safety & certification procedures**, including comprehensive job safety analysis (JSA), written procedures, and QA systems
- ▶ **Integrated service model** for inspections, repairs, cleaning, and rigging for park and facility-side assets

Core Services

Ride & Attraction Services: Inspection, on-site weld repair, and post-inspection support for track mounts and structural supports

Lighting: Installation, repair, replacement, and removal of at-height lighting and light walls

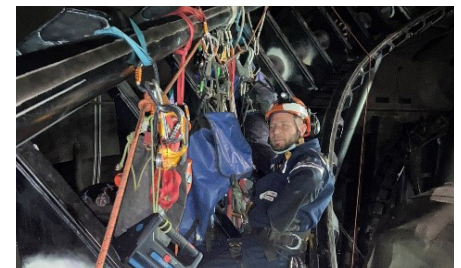

Netting Systems: Netting installation, inspection, and repair, and fall protection and debris control solutions

Facilities Management: At-height inspections and maintenance for resort facilities, including façades, HVACs, storage tanks, and piping inspections, with integrated integrity data management

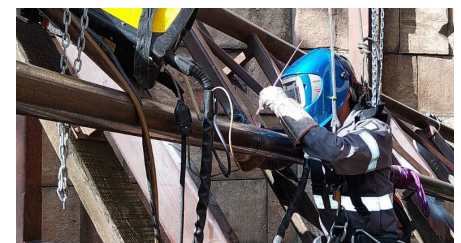

Additional Capabilities

MISTRAS often begins with critical repairs and evolves into multi-year inspection and maintenance programs. Our presence on-site enables quick identification and execution of new opportunities—delivering added value without disrupting operations. Other available services include:

- ▶ Special event prop and assembly installation for banners, curtains, and special effects
- ▶ Underwater inspections
- ▶ Corrosion remediation and spot coating
- ▶ Drive & torque inspections
- ▶ Post-construction cleanup and specialty cleaning

Rapid access for hard-to-reach locations

Integrated service model for attractions and facilities
