

Application Brief

At-Height Access Solutions for Safer, Efficient Structural Protection

MISTRAS Group (MG: NYSE) delivers at-height rope access services to ensure the safety, reliability, and longevity of entertainment structures, such as stadiums, arenas, and amphitheatres. Our multi-disciplined technicians reduce operational downtime and reliance on scaffolding while accessing hard-to-reach areas that traditional methods can't reach safely or efficiently.

We help clients reduce risk, extend asset life, and limit disruptions with high-value structural solutions—ranging from preventive inspection to large-scale repairs.

Why MISTRAS for Entertainment Structures

- ▶ **Certified, multi-disciplined technicians** trained in confined and elevated access
- ▶ **Rapid deployment & minimal disruption** to events, public spaces, and attractions
- ▶ **Integrated service model** for inspections, repairs, cleaning, and rigging
- ▶ **Rigorous safety & certification procedures**, including comprehensive job safety analysis (JSA), written procedures, and QA systems

Core Services

Backed by decades of rope access experience, our services are trusted by leading venue operators.

Roof Repair: Complex membrane system repair, snow removal, cable installation, and more.

Sound Baffling & Acoustics: Baffling system installation and retrofitting at new and legacy venues that meets new stadium sound standards.

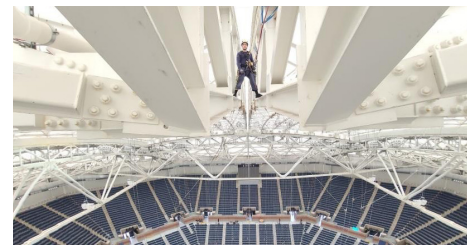

Lighting Installation & Replacement: Safe and efficient changeout of stadium and show lighting.

Netting System Installation: Fall protection and debris-containment netting solutions.

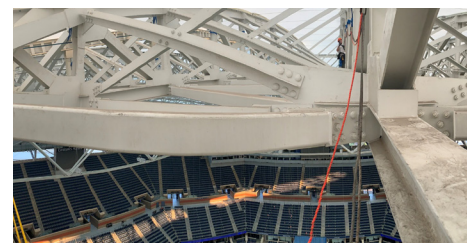

Additional Capabilities

MISTRAS often begins with critical repairs and evolves into multi-year inspection and maintenance programs. Our presence on-site enables quick identification and execution of new opportunities—delivering added value without disrupting operations. Other available services include:

- ▶ Event Rigging Support & Banner Installation
- ▶ Elevated Cleaning, Coating, and Spot Painting
- ▶ Non-Destructive Testing (NDT) & Leak Detection
- ▶ V-Deck Suspended Work Platform Access

Certified rope access technicians minimize downtime and safety risks

Rapid deployment for scheduled and emergency at-height access
