MISTRAS EMPLOYEES EARN SAFETY MILESTONE AT CHEVRON PASCAGOULA (MS) REFINERY

PRINCETON JUNCTION, N.J. – MARCH, 2017 – MISTRAS Group, Inc. (NYSE:MG) is proud to announce that employees assigned to the Chevron Refinery in Pascagoula, Mississippi have completed over one million hours of work with zero recordable injuries.

Chevron recognized the MISTRAS team with an “Outstanding Safety Performance” award, which comes as a product of both companies’ commitment to safe operations. MISTRAS’ culture of accountability and Chevron’s Ten Tenets of Operation encourage all refinery personnel to stay aware of any potential safety hazards, and authorizes them to stop work in case of any safety concerns.

“Our relationship with Chevron is one built on trust,” said Chris Smith, Group Vice President, Corporate Compliance. “MISTRAS works tirelessly to demonstrate our commitment to keeping people and equipment safe. The most important asset that we have to offer is our knowledgeable, dependable personnel, and this milestone shows off the value they offer each and every day.”

The Pascagoula refinery is Chevron’s largest facility in the United States, and one of the largest petrochemical refineries in the country. MISTRAS employees are integral to the facility’s operation processing nearly 14 million gallons of crude oil into 5.5 million gallons of gasoline per day.

About MISTRAS Group, Inc.

MISTRAS is a leading “one source” global provider of technology-enabled asset protection solutions used to evaluate the structural integrity of critical energy, industrial and public infrastructure. Mission critical services and solutions are delivered globally and provide customers with asset life extension, improved productivity and profitability, compliance with government safety and environmental regulations, and enhanced risk management operational decisions.

MISTRAS uniquely combines its industry-leading products and technologies - 24/7 on-line monitoring of critical assets; mechanical integrity (MI) and non-destructive testing (NDT) services; destructive testing (DT) services; process and fixed asset engineering and consulting services; and its world class enterprise inspection data management and analysis software (PCMS™) to provide comprehensive and competitive products, systems and services solutions from a single source provider.
